

AT-55 Analogue Telephone

AT-55M

Cost Effective Feature Access

A hard working versatile solution, the **AT-55M** provides simple feature access with CID in a cost effective, streamlined package. The **AT-55M** is an ideal alternative to a multiline digital phone when feature access is required at a lower cost.

One Touch Simplicity

Access to frequently dialed numbers and features is made simple through 10 one touch memory keys, while a two way speakerphone is ideal for those areas of the business that require a hands on approach. With a built in message waiting indicator, the **AT-55M** provides a perfect solution for office.
