

Cannon

Chipset Innovation

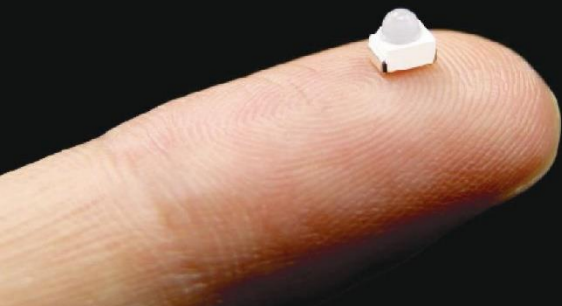

Dahua newly released an in-house ISP, Cannon, which features better image & signal processing capability and support high resolution of 1080P/720P@25/30fps, as well as OSD menu for advanced settings.

HD/SD Switchable

4-in-1 Camera

Featuring New Microcrystalline IR LED :
Half the Size, Double the Brightness

Small Size

High Brightness

Micro-lens

Low-power

Superior 2DNR

The Cannon ISP adopts advanced 2DNR algorithm which reduces noise more efficiently. With superior 2DNR, the Cannon series HDCVI cameras provides clearer image and helps to save storage space.

Effective DWDR

In applications whereby the camera is pointing towards intense light or is placed somewhere with both glare and low light, DWDR feature can be enabled in order to see both front and back view clearly.

*CVBS = Composite Video Baseband Signal.
Composite signal used to be the most commonly used analog video interface.
