

**Integrated cable management system**  
An integrated cable management system hides all cabling within the extension column covers and through decorative ceiling cover.

**Column drop length**  
To set down column height requirement from ceiling, simply select appropriate screw holes position to determine viewing height. Each screw hole spacing is 2 inches increments. Full range of extension from 28.2 inches (717 mm) to 62.4 inches (1585 mm) from ceiling

**Screen leveling adjustment**  
To set parallelism of your screen after installation, simply release 2 security nuts behind the tilt mechanism and tighten once parallel of screen has set.

**Tilt angles adjustment**  
To tilt screen, simply release the cap screws at both sides of the interface by supplied Allen key. Adjust screen to your desired angles from +15 to -5 and tighten cap screws when set.

**Horizontal roll angles**  
To roll left right horizontal screen angle, simply release the vertical knob on column, and turn screen according to you desired angle to the maximum of  $\pm 20^\circ$
