

RAN-GER[®]

Convenient and easy , convenient to remove, dispose and maintenance System adopts full elecontrol signal transmitting technique,simple to install.

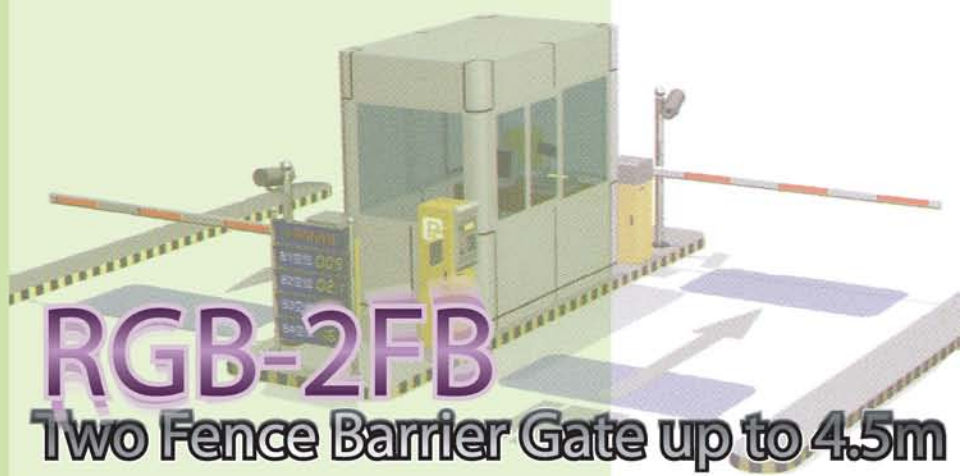

By security, barrier will automatically go back when meet obstacle during the process of lifting and falling. Infrared photocell is optional for you.

Humanization clutch, can loosen the barriers bar conveniently. After open the humanization clutch, the bars can up and down byhand easily.The control system can be reset automatically when power on.

Special craft machine core with the mechanism of electronic technology and use of compress spring.

Traffic light signal system circuit can be connected to 220V indication light. The light will turn red during pole lifting, falling processes and after falling limits. Turn green after lifting limit.

Barrier can be both right - fixed and left - fixed.

RGB-2FB

Two Fence Barrier Gate up to 4.5m

FEATURES

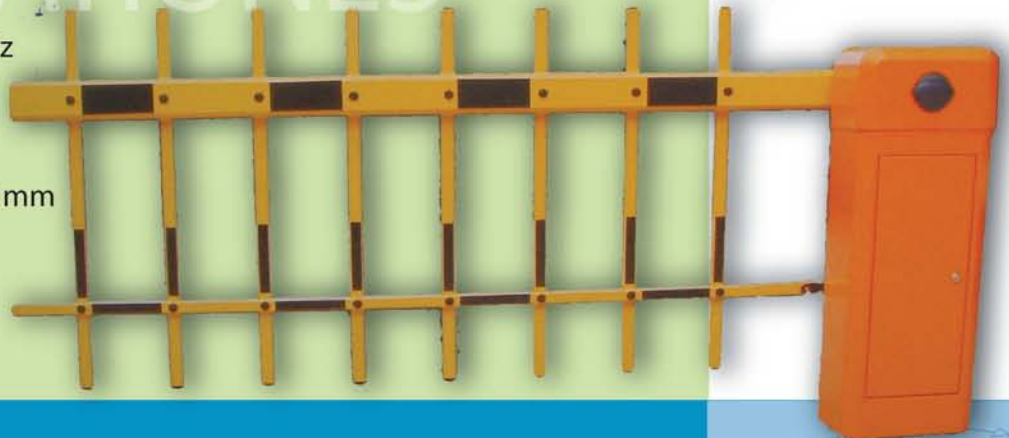

Vehicles detectors connection, convenient to connect with vehicles detector which realize other related safe function.

Unique surface craft facture and fluent shape design. High resistance to rust. Assure the colour and the material of crust be fresh and prolong its life. Occupancy - less and comfortable.

Calmly pole lifting, no obvious dithering, All the process is soft without any noise and shaking.

SPECIFICATION

- Power supply : 220VAC , 50Hz/60Hz
- Rated power : 80W
- Beam lifting & falling time : 6s
- Dimension : 958 x 355 x 292 mm
- Dimension(Arm) : 4.5 x 0.25 x 0.08 mm

AUTOMATIC AND INTELLIGENT BARRIER
