2.4" TFT Color Screen
Fingerprint Access Control Terminal

LF10

LF10, is a fingerprint access control terminal, which equipped with 2.4-inch TFT Color Screen and European and American design style for its appearance. TCP/IP is also available which enable LF10 to be applied in different network.

Also it is standard with USB-host, which Supports U disk to upload and download data, convenient for the data management. Its advanced access control function makes its security further improved, suitable for all kinds of places with high security requirements.
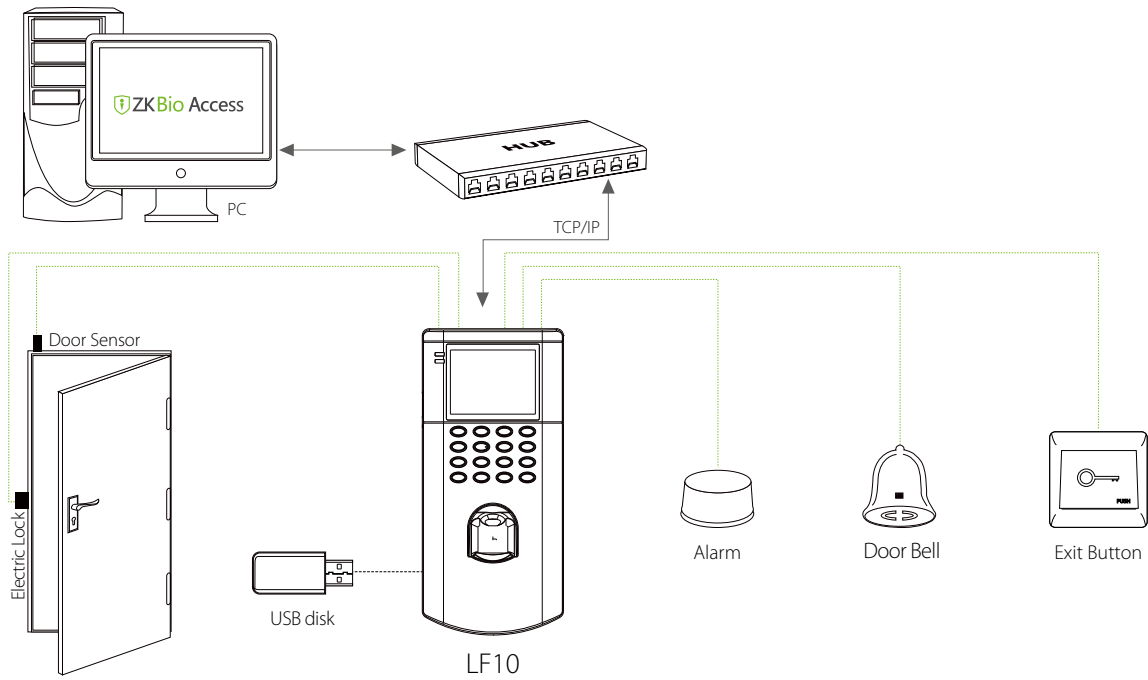

Features

• Communication: TCP/IP, USB host
• Standard advanced access control function to ensure the safe of working environment
• Support for Multiple verification methods,demonstrating safety and efficiency

Specification

Display	2.4-inch TFT Color Screen
User Capacity	1,500 (optioanal card:5,000)
FingerPrint Capacity	1,500
Card Capacity	5,000(Optional)
Transaction Capacity	80,000
Standard Functions	Record Query, Automatic State Switch, Multiple Verify Modes, Wired doorbell, Wiegand Out
Communication	TCP/IP, USB host
Optional Functions	ID Card, 13.56MHz IC Card
Access Control Interface	3rd Party Electric Lock, Door Sensor, Exit Button, Alarm output, Auxiliary Input
Operating Temperature	0 ℃- 45 ℃
Operating Humidity	20%-80%
Power Supply	DC 12V 1.5A
Dimensions	83*180.09*33.2mm
Supported Softwares	ZKBioAccess
