Wing 205

Enjoy the convenience of automation

Wing Arm Autogate

Proudly Malaysian product. We have 40 years of expertise and continuously improving our system to give you proven quality, durability and reliability.

1 Work harder and last longer

MightyDC full metal gear high torque motor, heavy-duty bearing and more than 100 microns extra thick powder coating have proven to last for years to come. The dual-speed controller reduces mechanical wear thus reducing maintenance costs.

MIGHTY DC

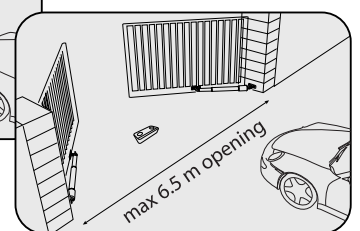

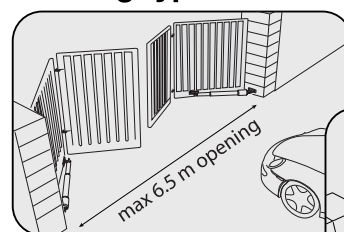

2 Higher security and safety

SpiralLock automatically self locks the gate after fully closed. No more hassle of an additional lock at the gate. Adjustable high speed allows the gate to be closed faster to prevent any intruder. Gate stops if blocked by an obstacle.

SpiralLock

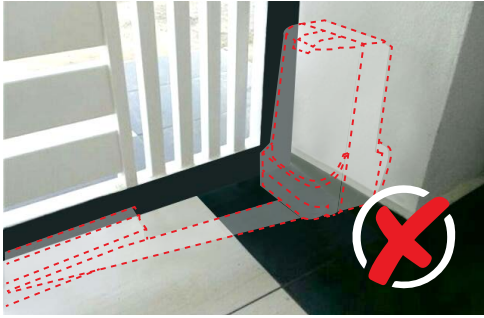

Folding type

Swing type

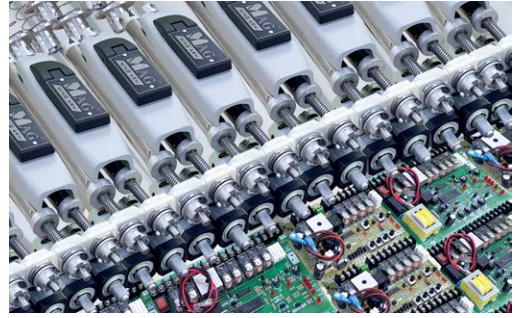

3 Work more seamlessly

MightyDC gear ratio is optimized for extra quiet operation. Our backup battery system ensures at least 50 times opening during power failure. No more big motor at pillar. Swing arm motor blends in nicely with the gate at bottom.

4 Faster spare parts

No more weeks of long waiting for imported parts. MAG full spare parts is available locally to get your gate fixed faster.

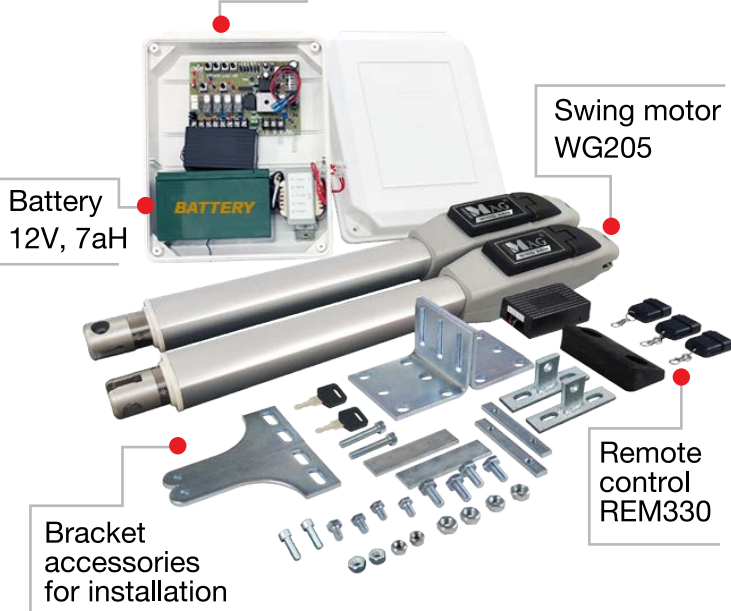

Feature

Select the one for you. We offer 3 types of systems to cater to your needs.

Model number	Wing205 	Wing303	Wing201
Types of swing motor	WG205	WG303	WG201
